Nguyen Duc Trong

Data/AI engineer internship

Contact Information

trongnd02@gmail.com

District 6, Ho Chi Minh city

0931 469 045

Education — FPTU

3 times honorable student

1 time excellent student

Technical skills

ML/ DL, NLP, Python, Git, Docker

AWS(EC2)

Data skills

Data manipulation, crawling, EDA

SQL (TSQL), NoSQL (MongoDB)

Tools

Orange, DBeaver, Paradigm

Languages

Japanese (~N5)

English (IELTS 6.0)

Certificates

1/ Basic & Intermediate SQL
Organizer: HackerRank

2/ Basic Python programming
Organizer: HackerRank

3/ Spring volunteer campaign
Organizer: USSH

Hobbies

LaTeX, Python, Linux

Sci-fi, Linguistics, AI-related

Pop, Ballad, Country

Eng, Jap

Social Network

Objective

In the following OJT semester, I am seeking an opportunity to participate in data engineer team. In case of lacking vacancy, nevertheless, I have no hesitation in NLP project led of Nguyễn Võ Thành Khang

I truly believe that not only my skill set but also my personality traits, be it diligence, inquisitiveness, and fastidiousness, will make me an ideal candidate.

I desire to acquire some more technical skills including cloud computing, NLP, big data as quick as possible down the road.

Projects

Spelling correction

Team project

Status: Maintaining (18/09/2023)

Role: Leader

Description: An basic web app incorporated with original Transformer model with two slight modifications.

Technologies: NLTK, Regex, Torch, Ngrok, HTML/ CSS, JS

Future development: Extend to Vietnamese, enhance model accuracy, dockerize & deploy on EC2.

Movie recommendation system

Personal project

Status: In progress (01/07/2023)

Description: Recommendation system using cosine similarity technique and being deployed by streamlib. Movie data & metadata were crawled with the assistance of multiprocessing, followed by EDA and wrangling procedures.

Technologies: pandas, multiprocessing, matplotlib, wordcloud, seaborn, plotly, streamlib.

Future development: Integrate rule-based or DNN chatbot.

Mini project

Cursor controlling with hand gestures

Personal project

Finished

Description: Control cursor with hand gestures using mediapipe library for hand recognition

Technologies: mediapipe, opencv, autopy, pynput
